The Republican believes in strictly one price for advertising, and accordingly it publishes its rates in full, and exactly as they are. Special position ads 25 per cent extra. Preferred Local ads 10 cents per line first insertion, and 5 cents per line each subsequent insertion.

All contracts and bills for advertising payable monthly.

Unity and harmony of action are the life and strength of the Republican party.

A definite and conservative policy brings all the elements of a party together.

After you have read THE SUNDAY REPUBLICAN send it to your friends in the East. It is a first-class immigration agent.

Mining interests are picking up all over the Territory and a genuine mining boom is sure to be felt within our next twelve months.

The Central committee are the recognized political authorities of the Territory and counties. They alone can outline and direct party action.

These are the days that make one wish he could disport himself in the surf for a few hours at some of the neighboring Pacific coast resorts.

The sale of the Harqua Hala mine, as reported exclusively in yesterday's REPUBLICAN, means renewed activity at that camp and increased business for Phoenix.

Write your friends both East and West that the North and South railroad is coming and if they want to get in on the ground floor of Phoenix' boom to come on now.

Congressional discussion makes "mighty interest" reading" these days to Western people. The silver question is of paramount importance to all the Great West.

The greatest Democratic majorities always come from the precincts, wards, cities and States in which there is the largest amount of illiteracy. Hence it is to be expected that party will oppose compulsory education. Ability to read and write are not pre-requisites for Democracy.

The czar promises reform of Siberian convict administration. Even if he fails to fulfill his promise the giving of it shows that public opinion outside of his own dominion begins to command his attention. It is something gained toward the popularization of Russian Government.

That was a peculiar accident at Rockford, Illinois, Friday in which four section men were killed and two seriously wounded by an engine being derailed. Probably in all the history of railroading there never was before an accident occurring at a spot just where it would catch the section men in its deadly embrace.

Views regarding the Newfoundland imbroglio in English government and naval circles offer but little encouragement to the colonists. There seems to be unanimity in putting them in the wrong. If British war ships go to the French shore they will be more likely to maintain the French than the colonial contention.

Berkeley adjourning their Lake Mohawk conference, the representatives of the Negro race very sensibly took an advanced position in favor of greater educational facilities for the colored people. Nothing else will do so much for the settlement of the race question in the South as more free public schools for both white and black.

The Republican stands ready to aid the Central Committees at any and all times. The Territorial and County Committees should meet without delay, for even our friends cannot help working at cross grains occasionally when no party policy has been outlined. In the words of the New York Sun "get together" Messrs. Committeemen, and let us know in what way we can strike the most effective blows for the success of the party.

It strikes THE REPUBLICAN as being a great waste of public funds to pay \$100 a month for electric lights for the Court House. Outside of three to five lights for lighting the Jail, Jailor's and Sheriff's offices where are the remainder of the lights to be used. Don't throw away money, gentlemen, because it comes from the public funds. Such a contract as you have made is clearly throwing away the biggest part of the sum set apart for that contract.

THE NORTH AND SOUTH RAILROAD.

The North and South railroad is coming and a new era of prosperity is dawning for central Arizona. This Republican of yesterday conveyed to every household in Phoenix the cheering news that the much talked of Maricopa Subsidy bill had passed the Senate by a handsome majority, and everybody was glad. The result was not unexpected to those who had "inside" knowledge of what was going on, although many citizens felt doubtful of the ability of the friends of the measure to overcome the powerful influence of the Southern Pacific people who were known to be opposing the passage of the bill, and now the enthusiasm of the community is somewhat tempered with anxiety as to what the President's action will be. From all THE REPUBLICAN can learn from the best sources of information, there is little fear but what the bill will become a law, and the road be constructed without delay.

The importance of this enterprise to central Arizona is evidenced by the deep anxiety of the people and the unanimity of sentiment on the subject. No public work could possibly be devised to insure greater benefits to the Territory commercially and otherwise. Our readers are so fully informed upon the merits of the case that extended comment is unnecessary. Suffice it to say good feeling has been stimulated wonderfully by the news and the prosperity of the people is felt to be assured.

While there has been active opposition to the measure by interested parties in the community whose motives have perhaps been honest if their judgment has been poor, it would seem well at this time to avoid recrimination, and everybody join in promoting an enterprise that is acknowledged to be a great necessity. Too much cannot be said in praise of the friends who have been prominent in securing the passage of the bill. They have successfully performed a very difficult task and the people know and appreciate them.

THE REPUBLICAN counsels moderate enthusiasm until the President's action is known and then if favorable it would be properly in order for the community to jubilate.

Mr. J. C. PILLING of the Bureau of Ethnology thinks that Indian words should be more frequently used in giving names to streets and avenues in our towns and cities. He is one of the best informed men on Indian languages in the United States, and he declares that many Indian names are musical and easily pronounced. He also suggests that none but words taken from the language of the tribes which once inhabited a particular locality should be used in that locality. Could Mr. Pilling visit Phoenix he would find a city in which his ideas had been religiously carried out in naming all the North and South streets. Nor are the names difficult to pronounce. Not only that, but many are really musical, as Mr. Pilling says. What more beautiful names for streets than Maricopa, Pima, Cortez, Montezuma, or any other of a dozen that might be named. Phoenix has set a good example in this respect that might well be followed by other cities.

Irish potatoes have in years past, owing to a lack of attention to "such small matters" by the ranchers, been shipped in here to the extent of some four carloads per month. To say nothing of the first cost of the tubers, the freight bill was \$240 per car, and the sum thus lost to the country was indeed a very important item, in balancing the community's books for the profit or loss of the year. This season, however, has shown a happy change, and, instead of being obliged to import potatoes there may be a surplus to send abroad. The potatoes coming in so bountifully are mostly of the Early Rose variety, large in size, showy in appearance and of excellent quality. The price obtained by the growers is from one and three-fourths to two cents per pound and at this rate they closely approach an orange grove in the profit returned.

The new cruiser Charleston attracted great attention at Honolulu. Almost before other nations are aware the United States will again have the best navy afloat.

The New Republic.

In a few months the operation of the federal constitution of the Central American Republic goes into effect. The result will be watched with much interest in the United States. The States included in the compact are Guatemala, Salvador, Honduras, Nicaragua and Costa Rica. The following are the statistics of the five States which will form the new republic:

| State. | Population. | Area, sq. miles. | Foreign trade. |
|-------------|-------------|------------------|----------------|
| Guatemala. | 1,372,000 | 36,800 | \$9,272,265 |
| Salvador. | 651,129 | 7,225 | 7,515,735 |
| Honduras. | 438,000 | 46,400 | 3,100,000 |
| Nicaragua. | 275,815 | 49,500 | 4,225,000 |
| Costa Rica. | 218,785 | 25,000 | 6,765,428 |
| Totals. | 2,956,030 | 172,925 | \$31,443,014 |

One of Mirabeau's Descendants.

[Paris letter to Philadelphia Times.] The Vicomtesse de Martell is better known at home and abroad by her nom de plume of "Gyp." Descended from the great Mirabeau, this lady has evidently inherited some of the caustic wit of the Republican orator. Her writings are brilliant and mordant pictures of modern French life, generally cast in the form of short dialogues, marriage divorce, the present education of children, the frivolity, hypocrisy and godlessness of society, are pitilessly depicted in powerful and oftentimes coarse satires, which give an unpleasant picture of Paris high life as told by one of themselves, for Mme. de Martell moves in the best set and is much courted and feared by the giddy world where she chooses her models and who do not care to figure in the pages of one of "Gyp's" witty volumes.

Hunted Preparations.

[From the New York Weekly.] Good Minister (awaiting the appearance of the lady of the house)—What is that, my little dear? Little Girl—My apron. I'm going to put it in the wash. Mamma got it all dirty. "She did?" "Yes, sir; she grabbed it up, just now, to dust off the Bible."

THE MOCKERY OF FAITH.

BY F. C. HICKS.

Proud Phoenix sits on long forgotten graves. Ten thousand ages by. The race who lingered—er they crossed the Stygian waves. On Charon's dismal ferry. No human power can alter their history, Or tell the youth and glory That centered here—'tis all a mystery, Entombed in cycles hoary.

Some say the Zuni tilled these lands—and some, In theory pottery; Find ancient pottery, and sculpture dumb That indicate the Aztec. They say the Montezuma once held sway Where now our City Hall is; And taxed the farmers in the royal way For wealth for princely follies.

</
